ATW Internet-Tutorium

The three basic rules when using Internet/LAN in the ATW

There are three basic rules in the ATW concerning the using of Internet/LAN:

1. Keep system up-to-date at all times [Windows Updates]

1.1 Manual update (Multilanguage Windows version)
- ✔ in the Internet Explorer go to **Tools**
- ✔ **Windows Update**
- ✔ **Search for Updates**
- ✔ Install all updates listed at **Important Updates and Service Packs** until the number of updates left is zero (sometimes severar reboots of the system are needed).
- ✔ Some useful updates will be found at **Windows 2000** or **Windows XP**. These updates are not critical so they don't have to be installed.

1.2 Automatic Update

a. Update Service of the GWDG
- ✔ Manual at *http://sus.gwdg.de* (Windows XP professional only)

b. Windows Assistent for automatic Updates
- ✔ The assistant can be found at **Start** or use the appropiate symbol in the lower right corner.

After a new installation of a system paches and updates should be installed immediately to get the system in a current state or otherwise an infection with viruses and worms would be possible right away.

2. Virus protection [http://atw.goe.net/viren.php]

2.1 Sophos Update Service of the GWDG [free for students in Göttingen]
- ✔ Manual and Software at *http://antivir2.gwdg.de*
- ✔ Password at *http://atw.goe.net/atw-intern/antivir.html*

3. A constant visit to the ATW home page

- ✔ *http://atw.goe.net*
- ✔ In the forum at **Computer & Internet** are all important and current information.
